becomes rational, fertilizer prices cannot come down. Has the Ministry got an overall policy already ready or is it under formulation?

SHRI S. KRISHNA KUMAR: Sir, the Government has already a policy framework. The present production of gas is about 48 million cubic metres per day of which 11 million cubic metres are being flared. One of the objectives is to reduce flaring to zero. For that a Rs. 7200 crores project has already been initiated with the aid of the World Bank. Several oil and gas development projects including Neelam, Mufta, Ravva etc. with an overall investment of about Rs. 7500 crores have already been sanctioned or are in the pipeline. When these projects are implemented gas production will be raised to 80 million cubic metres per day. As of now 92 million cubic metres of gas per day stands committed including the in-principle commitments. The Government have a policy of enhancing the production, reducing the gas flaring to zero as well as streamlining the allocation including the allocation for downstream projects, synchronising the establishment of the downstream projects so that the gas which is a very important resource of the country is optimally utilised.

(b) whether it is also a fact that the Board increases the rent of such properties frequently; and

(c) if so, what action Government propose to take to mitigate the hardship of the occupants of such houses so that they are not exploited by the Board?

THE MINISTER OF HOME AFFAIRS (SHRI S. B. CHAVAN): (a) to (c) In terms of Section 11(1) of the Administration of Evacuee Property Act, 1950, evacuee Wakf properties vest in the Punjab Wakf Board. A displaced person occupying such property as tenant would have the same position as any other tenant *vis-a-vis* the Wakf Board and the question of Government intervention does not arise.
